

Product Specification Sheet

Product: Cashew Kernel W180
Country of Origin: Guinea
Product Type: White Whole Cashew Kernels

Product Description

Cashew Kernel W180 consists of premium large white whole kernels with an average count of 170 to 180 kernels per pound. This grade is highly valued for premium retail packing, confectionery, and high-end food applications.

Technical Specifications

Parameter	Specification
Kernel count per pound	170 – 180
Moisture content (max)	5%
Defective kernels (max)	8%
Broken pieces (max)	5%
Foreign matter	Absent
Color	White to pale ivory
Odor and taste	Natural, free from off-odors and rancidity

Microbiological and Chemical Standards

Products are handled under hygienic conditions following internationally recognized food safety best practices. Third-party laboratory testing can be arranged upon request to verify compliance with buyer and destination market requirements.

Packaging Specifications

Packed in food-grade polyethylene inner liners and sealed in 10 kg or 25 lb tins. Packaging methods are designed to preserve freshness and prevent contamination during transit.

Shelf Life: Up to 12 months under cool and dry storage conditions.
Storage Conditions: Store below 25°C, away from moisture and direct sunlight.

Traceability and Quality Control

Each production batch is identified and recorded to ensure traceability from raw cashew nut sourcing through processing and final packing. Pre-shipment inspection and visual quality checks are conducted prior to dispatch.

Quality and Safety Best Practices

Processing follows established industry best practices including controlled drying, hygienic handling, foreign matter prevention, and moisture monitoring. While no formal certifications are currently held, operations are aligned with principles commonly associated with HACCP-based food safety systems.

Commercial Information

Minimum Order Quantity: To be confirmed based on shipment terms.

Available Incoterms: FOB, CIF.

Port of Loading: Conakry, Guinea.
